

# Don't let your problems be static.

JdS98

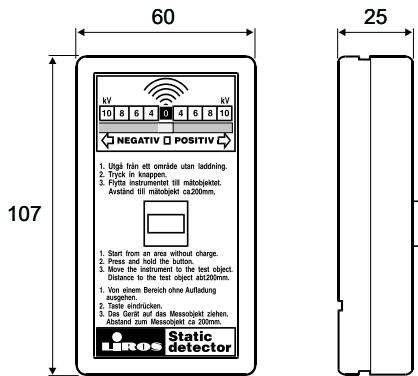

## The reason for your production interruption can be static charge.

### Liros Static Detector

A measuring instrument for quick localization of static charges -  
indicates the level and polarity of the charge

- ▶ Measurement is performed without touching the charged object.
- ▶ Simple to handle. Just press the button and measure.
- ▶ Easy to read, even in direct day-light and dark environments.
- ▶ Measures level of charge and polarity.
- ▶ Small size. The detector can easily be put into the breast-pocket.
- ▶ Battery-operated.
- ▶ Low-cost

## Technical data

Dimensions: 107x60x25mm  
 Operating voltage: 9VDC (battery)  
 Current consumption: 30mA  
 Weight: 112g

## LIROS NO STATIC SYSTEMS

A wide range of antistatic equipments - the solution of problems with static charges

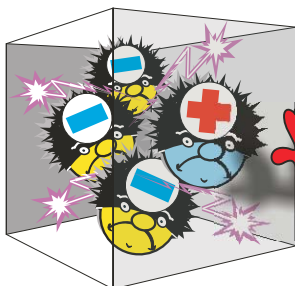

Standard and "custom-made" solutions for a quick and effective neutralization of the charge.

Ionizing air units for deep effect and longer working distance.

Complete charging systems for adhesion, fixing, positioning, static welding etc. are also included in our program.

Put your card here, please!

**LIROS**  
 LIROS NO STATIC  
 SYSTEMS

Put this page and your card in the fax + a simple description of your problem, and then we will draw up a suggestion for a correctly dimensioned system.
